Art Unit: 1765

1. This application is in condition for allowance except for the following formal matters:

***Election/Restrictions***

2. Applicant's election with traverse of Group I, claims 1-52 in the reply filed on 12/28/05 is acknowledged. The traversal is on the ground(s) that the search for both the invention is not a serious burden to the examiner. This is not found persuasive because the inventions are distinct for the reasons given in the previous office action and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

The requirement is still deemed proper and is therefore made FINAL.

3. This application is in condition for allowance except for the presence of claims 53-54 are directed to an invention non-elected with traverse in the reply filed on 12/28/05. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

4. The prior art made of record in PTO-892 and not relied upon is considered pertinent to applicant's disclosure.

5. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art Zhou et al (USP 6,287,979) teach a process of forming air gap between conductive lines by removing sacrificial layer from the filled trench but fail to teach the process including the steps as recited in claim 1.
